The floating fenders/ scrap assets shall be collected subject to the following conditions:

The buyer must arrange a truck with an extendable/telescopic flatbed trailer suitable for a 26-metre load, with a minimum payload capacity of 25 tonnes.

Cutting or dismantling of the fenders at the collection location is strictly prohibited.

The buyer must coordinate with Mr. Adeef at 0561774065 to arrange loading.

The floating fenders will be removed from the creek and placed in a designated area by the maintainer, M/s. Waagner Biro - Egis, only.

Note: Buyers are requested to inspect and ensure that the required transportation and lifting arrangements are in place before participating in the auction.
